October 31, 2008

The Dartmouth Undergraduate Journal of Science will hold a series of events in mid-November to celebrate the launch of its Fall 2008 issue and promote interdisciplinary science discussion on the Dartmouth College campus.

DUJS TALKS: A “Paper Party” Across the Sciences
Wednesday, Nov. 12, 3-6PM (Occom Commons, McLaughlin Cluster)
• This event is modeled on the “paper parties” of many science departments, during which students and faculty come together to discuss their latest work. DUJS TALKS is an opportunity for science majors and faculty to informally talk about the current state of research at the College. Three professors will present their work to participants. Food will be served.

DUJS WRITES: The DUJS Science Writing Workshop
Saturday, Nov. 22, 9AM-1PM (Haldeman 041)
• This four-hour long session serves to introduce participants to the process of science writing. It will include sessions on science news writing, technical journal article writing, ethics and data interpretation. The speakers include Dartmouth professor Megan Steven, College Outreach Director and former science writer Nancy Serrell, and Dartmouth Medicine Editor Dana Grossman. Lunch will be included. Interested students must RSVP to the DUJS: dujs@dartmouth.edu.

Over the past 10 years, the DUJS has published quarterly issues covering recent advances, interviews with Dartmouth scientists, and breakthrough research by undergraduates. In addition, the DUJS covers science weekly online. The DUJS serves to expose students to the peer-review process that is at the heart of science research today.

The Dartmouth Undergraduate Journal of Science aims to increase scientific awareness within the Dartmouth community by providing an interdisciplinary forum for sharing undergraduate research and enriching scientific knowledge.
